CORE EXPERTISE

ENGINEERING LEADERSHIP

- Technical Direction
- Team Coordination
- Product Delivery
- Architecture Decisions
- Stakeholder Collaboration
- Requirements Definition
- Production Ownership

AI-NATIVE DELIVERY

- AI Agent Orchestration
- Context Engineering
- Code Review
- Validation
- Testing Strategy
- Technical Documentation
- Quality Control

FULL-STACK & CLOUD

- JavaScript
- TypeScript
- Node.js
- Vue.js
- Express
- REST APIs
- MongoDB
- MySQL
- Google Cloud
- Cloud Run
- Cloud Functions
- Firebase
- Docker
- GitHub Actions

ADDITIONAL TECHNOLOGIES

- React
- Next.js
- Supabase
- PostgreSQL
- Kubernetes
- Terraform
- AWS
- Playwright
- WordPress
- PHP

LANGUAGES

Spanish

Native

English

Professional written communication and technical collaboration.

Enzo Pelizzari

Technical Lead | Full-Stack Systems | AI-Native Engineering

Open to Remote International Opportunities

PROFESSIONAL SUMMARY

Technical Lead with 7+ years of experience building and evolving full-stack products, cloud infrastructure and system integrations. I combine engineering leadership, product ownership and an AI-native development workflow, orchestrating AI agents while retaining responsibility for architecture, validation and production quality. Experienced in translating complex operational requirements into reliable systems and coordinating delivery across engineering, QA and business stakeholders.

PROFESSIONAL EXPERIENCE

net2phone

2021 — Present

Remote

Technical Lead, uCRM

April 2025 — Present

- Lead the technical evolution of uCRM, a CRM product embedded within the uContact platform and active across 20+ companies in more than 10 countries.
- Own technical direction across full-stack architecture, product delivery, system integrations, cloud infrastructure, deployments and production operations.
- Lead a delivery team comprising a software developer and QA specialist, coordinating priorities, technical decisions, quality standards and stakeholder expectations.
- Translate product and operational requirements into technical plans, identifying gaps, defining scope and coordinating solutions with product, onboarding and platform teams.
- Orchestrate AI agents throughout implementation, refactoring, testing and documentation, providing context and technical direction while retaining responsibility for code review, validation and production readiness.
- Designed and implemented an automated provisioning system for new uCRM environments on Google Cloud, covering project creation, infrastructure configuration, backend and frontend deployment, database setup and supporting cloud services.

Developer, uContact / uCRM

2021 — April 2025

- Developed and maintained full-stack capabilities for uCRM, working across frontend, backend, databases and cloud services within the uContact ecosystem.
- Built integrations between uCRM, uContact and external systems using REST APIs, webhooks and event-driven workflows.
- Translated client and product requirements into technical solutions, estimates and implementation plans, collaborating with onboarding and customer-facing teams when requirements required clarification.
- Implemented customer-interaction workflows across CRM, contact-center, telephony and digital-channel use cases.
- Tested, documented and supported production releases, identifying gaps between written requirements and actual product behavior.
- Progressively assumed responsibility for delivery priorities, technical quality and architectural decisions, leading to promotion to Technical Lead in April 2025.

Integra CCS

2019 — 2021

Montevideo, Uruguay

Product Analyst

- Gathered and analyzed requirements across multiple client operations, translating business and contact-center needs into technical solutions.
- Developed custom forms, operational reports and integrations for multichannel contact-center environments.
- Built reporting solutions using MySQL and Jaspersoft Studio, improving visibility into client operations and performance.
- Integrated CRM, ticketing and customer-service platforms with contact-center systems and external providers.

- Delivered technical training and consulting to clients, supporting solution adoption and operational improvements.

SELECTED INDEPENDENT PROJECTS

VacciCheck

VIPERMED

Clinical decision-support application with a rule-based vaccine recommendation engine. JavaScript, Supabase.

Shingrix Costa Rica

GSK

Responsive four-page public healthcare website developed from approved GSK brand designs. HTML, CSS, JavaScript, Playwright.

Librería Médica Abrilar

VIPERMED

Private medical-content platform with custom components, embedded resources and user-interaction analytics. WordPress, PHP, JavaScript, ACF, GA, GTM.

SPEAKING & KNOWLEDGE SHARING

Technical Trainer

2024

net2phone

Delivered CRM and CCaaS training to multidisciplinary teams across Latin America.

Speaker — net2phone Partner Summit

2023

Presented uCRM capabilities and contact-center use cases to company partners.

EDUCATION

Analista en Tecnologías de la Información (Information Technology Analyst)

Completed July 2025

Universidad ORT Uruguay · Montevideo, Uruguay

Voting App DevOps 2025 — three-environment deployment architecture using Terraform, Kubernetes (AWS EKS), Docker and GitHub Actions, with automated CI/CD and cloud-based monitoring. [View repository →](#)
